

6th Workshop on Speciation, Techniques, and Facilities for Radioactive Materials at Synchrotron Light Sources and Other Quantum Beam Sources

**2nd (Wed) – 4th(Fri), March, 2011
Harima Science Garden City, JAPAN**

“**Actinide XAS**” is a series of unique international workshops, which focus on the basic- and applied research of radioactive materials using synchrotron-based techniques.

This workshop has been held in France (1st, 2nd, and 5th), USA (3rd), and Germany (4th), since the 1st workshop in 1996. Then the workshop comes to Japan for the first time. It will be held at **SPring-8**.

Topics (tentative):

- Solution and coordination chemistry of radionuclides
- Solid state chemistry and physics of radionuclides
- Radionuclides in environmental and life science
- Modeling and simulation tools
- Imaging Techniques
- Facility reports
- Others

Location:

SPring-8

- **Lecture Hall at SPring-8 Public Relations Center**
 - **Annex of JAEA, “Houkou-kan” for the poster session**
- Kouto 1-1-1, Sayo-cho, Sayo-gun, Hyogo 678-5198, JAPAN
